Monteringsanvisning

Før du monterer dette apparatet er det noen få ting som er lurt å ha kjennskap til:

1. Vi er klar over at bobleplast rundt hele apparatet ikke er kjempegøy å fjerne eller kanskje vinner årets designpris, men foreløpig er det den beste måten vi har funnet for å beskytte ditt apparat fra skader under transport.
2. Ditt apparat har vært montert i vår kvalitetskontroll. Det betyr at alt passer, selv om det noen ganger kan være litt vanskelig eller føles som om ting ikke passer helt under selve monteringsprosessen. Det er viktig å huske på at du ikke skal stramme alt med en gang du fester det - som regel strammer vi ikke før alt er på plass. Da vil du også merke at monteringen blir enklere.
3. Ripper og skader på rammen – dette har noen ganger skjedd selv om vi har brukt bobleplast, eller så kan det noen ganger skje hos deg under oppakking og/eller monteringsprosess. Ikke fortvil! Vi har farge på lager som vi kan sende til deg, slik at ripene kan skjules.
4. Monteringsråd:
 - a. det er lurt å bære alle delene dit du skal montere for å ikke måtte løfte alt flere ganger. Pakk delene ut og lag deg en oversikt på alt du har og hvilke verktøy du kommer til å bruke. Et skrallesett kan vi garantere at du må bruke!
 - b. Når du trenger å bruke hammer; bruk en gummihammer.
 - c. Sørg for å være minimum to personer i de tunge prosessene. Det er ikke anbefalt å la vekten av apparatet henge i en bolt eller gjenge.
 - d. Vi pleier å bruke Boxjump (plyoboks) som «stige».
 - e. Godt humør og kjærlighet er anbefalt!

Ps. Dersom dere har flere apparater å montere, vil en stor del av jobben være å pakke alt opp, fjerne bobleplasten og legge delene på riktig sted. Dette er altså oppgaver du kan be andre hjelpe deg med. Selv de som har null erfaring fra montering vil raskt kunne gjøre klart for montering og en stor del av oppgaven vil allerede være unnagjort!
